6.045J/18.400J: Automata, Computability and Complexity Nancy Lynch, Nati Srebro

Handout 10: Counter Machines

March 29, 2004 *Susan Hohenberger*

This handout will be distributed during Lecture 14 of 6.045 on March 29, 2004. It will not appear on the course website, but students needing a copy may obtain one by contacting the TA. **Students will be responsible for this material** on Quiz 2 and the final exam.

Material in handout:
Section 8.5 - Restricted Turing Machines
Pages 345-355
From *Introduction to Automata Theory, Languages and Computation*
By J. Hopcroft, R. Motwani and J. Ullman
