Term Project Presentation

In addition to the proposal, we ask you to give a short presentation (3-4 minutes). The lecture of **Thursday, April 10** will be dedicated to your presentations.

In the presentation you must briefly discuss the following:

- Description of the problem to be solved.
- Description of your proposed approach to the problem.
- Evidence for why you believe you will be successful doing your project in the time allocated.

Everybody in the class must give a presentation. If a project involves more than one person, all of them will have their 3-4 minutes slot. In this case, you must clearly explain how you divide the work and which part you will do.
